

Clax Beta

Alkali booster

1AL2

Description

Clax Beta is an alkali booster for soft water applications.

Key properties

Clax Beta is an effective alkali booster with anti-greying agents and iron binding capacity. Inclusion of the latter ingredients guarantees long lasting whiteness of fabric and avoids yellowing.

When combined with a mainwash detergent, **Clax Beta** enhances the wash performance on heavily soiled goods by increasing the pH of the wash liquor.

Benefits

When combined with mainwash detergent:

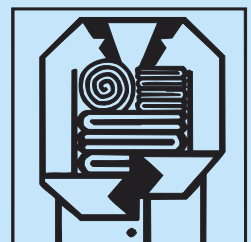

- Enhances wash performance (restaurant and kitchen linen)
- Counters greying of linen
- Avoids yellowing of fabric
- Improves wash performance by affecting soil-fibre interaction (swelling)

Use instructions

Dosing level is dependent on wash classification.

Dosing recommendation:

Soil level	Dosage (ml/kg dry goods)
Light	2 – 3
Medium	3 – 5
Heavy	4 – 10

Clax Beta
